

Plants For Wet Areas

Acer rubrum (Red Maple) **T**
Acorus (Sweetflag) **S**
Amelanchier canadensis (Serviceberry) **T**
Aruncus (Goatsbeard) **P**
Betula nigra (River Birch) **T**
Calycanthus floridus (Carolina Allspice) **S**
Carex (Sedge-most varieites) **S**
Cornus alba, racemosa (Tatarian, Gray Dogwood) **S**
 Ferns (Some varieties) **P**
Fothergilla **S**
Hibiscus-hardy (Swamp Mallow) **S**
Ilex glabra (Inkberry) **S**

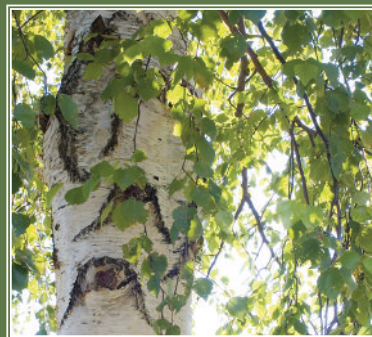

Juniperus
Juniper

Ferns

Hibiscus Syriacus
Rose-of-Sharon

Betula
Birch

Spiraea

Ilex opaca (American Holly) **T**
Ilex verticillata (Common Winterberry) **S**
Iris versicolor (Harlequin Blueflag Iris) **P**
Itea virginica (Virginia Sweetspire) **S**
Kalmia latifolia (Mountain Laurel) **S**
Leucothoe **S**
Metasequoia glyptostroboides (Dawn Redwood) **T**
Quercus palustris (Pin Oak) **T**
Salix (Willow-most varieties) **S/T**
Taxodium distichum (Bald Cypress) **T**
Vaccinium corymbosum (Highbush Blueberry) **S**

Difficult Site Plants

Extremes in temperature and soil conditions will stress your plants! Wet, poorly drained, sodden ground displaces oxygen in the soil and plant roots can suffocate. Conversely, when root systems are hindered by soil compaction, deprived of adequate irrigation, are root bound in containers or stifled by concrete and asphalt stress can also arise. When selecting plants for such areas be cognizant of these hazards and choose accordingly. After purchasing these types of plants it is important to recognize that they often need to acclimate to their surroundings before they are self-supportive. In other words, they need to crawl before they can walk, or in these cases root before they flourish.

Plants For Dry Areas

Betula (Birch) **T**
Caryopteris (Blue Mist Shrub) **S**
Cotinus coggyrgia (Smoketree) **T**
Euonymous alatus (Burning Bush) **S**
Ginkgo biloba (Maidenhair Tree) **T**
Hibiscus syriacus (Rose-of-Sharon) **S/T**
Ilex glabra (Inkberry) **S**
Juniperus (Juniper) **S/T**
Ligustrum ovalifolium (California Privet) **S**
Metasequoia glyptostroboides (Dawn Redwood) **T**
Microbiota decussata (Russian Arborvitae) **S**
Oxydendrum arboreum (Sourwood) **T**

Legend:
P – Perennial
S – Shrub
T – Tree

Sometimes the solutions to our gardening problems are right under our noses!

Parrotia persica (Perisan Ironwood) **T**
Pinus mugo (Mugo Pine) **S**
Pinus strobus (Eastern White Pine) **T**
Prunus sargentii (Sargent Cherry) **T**
Sarcococca (Sweetbox) **S**
Spiraea **S**
Syringa reticulata (Japanese Tree Lilac) **T**
Taxodium distichum (Bald Cypress) **T**
Viburnum (Some Varieites) **S**
Yucca (Adam's-Needle) **S**
